Sed ut

This is not applicable to our project. We decided to not use any web services.

Database design

Challenges

The three challenges/risks to our project at this moment are

- Time Constraints
- Database
- HTML to ejs and js

If we are unable to overcome these challenges, our plan to mitigate the impact would be to make additional meetings with Tzu Chi. These meetings are essential as they could help us get unstuck. Leading up to October 29th, we had troubles with our database. Working alongside Tzu Chi with several additional meetings, our database was up and running. In the event that Tzu Chi is unavailable, we will come together on a specific problem and try to break it down as a team.

Individual Contributions

Zion: Front End Wireframes, server.js editing

Latest git commit:

<https://github.com/CU-CSCI-3308-Fall-2021/CSCI-3308-Fall21-014-03/blob/main/wireframefrontend.png>

Liz: Front end recipes page, pushing milestone to git

Laura: Architecture Diagram, server.js editing
